

INSTRUCTION MANUAL

- (1) This water tank is manufactured with SUS 304 stainless steel plate, designed specifically for storing pH 6.6 - 7.2 standard tap water, and SUS 316 stainless steel plate, designed for storing pH 6 - 8 standard tap water.
- (2) Install this water tank on a sturdy and level base capable of supporting its weight. Do not install on uneven surfaces.
- (3) Flat bottom without stand water tanks must be installed on thick plywood, concrete, or FRP sheets only.
- (4) This water tank is suitable for installation with SUS 304 / 316, ABS, PVC, and POLY fittings. The use of MILD STEEL fittings is strictly prohibited to prevent rust corrosion in the water tank.
- (5) Modifying or altering any parts of the water tank is strictly prohibited.
- (6) The water tank piping must be securely fixed in place during installation to prevent damage.
- (7) Install the water tank away from polluted environments, chemical substances, and avoid proximity to rusty materials, such as a rusted metal fence.
- (8) This water tank must be installed outdoors.
- (9) Regularly discharge impurities from the tank, at least once every 3 months.
- (10) This water tank is designed for the storage of cold water at room temperature only.
- (11) This water tank must be filled with water after installation. The installer must ensure there are no defects before leaving.

TERMS & CONDITIONS WARRANTY

- (1) We provide a 10-year warranty covering manufacturing defects from the date of purchase, while accessories are not included in the warranty coverage.
- (2) Subject to the Terms and Conditions of Warranty outlined in the eTank Warranty Card, Esteel Manufacturing Sdn Bhd guarantees to repair or replace (at our sole discretion) any defect or fault resulting from our manufacturing process.
- (3) The warranty is void if the instructions provided in the manual are not followed.
- (4) The warranty does not cover any losses that may occur during transit, loading, and unloading processes.
- (5) The warranty does not cover any losses arising from damage to the water tank or negligence.
- (6) The warranty is void for any damages caused by force majeure events, such as thunder, fire, earthquakes, short-circuits, etc.
- (7) The warranty is void for any damages that occur to the water tank installed indoors.
- (8) The warranty is void for any damages caused by storing non-filtered water, underground water, contaminated water, disinfection agents, or other chemical substances.
